The Last Hope on Earth is a multiplayer third person survival/sandbox game. Hey guys! Back with another new content update on the game. Hope you guys enjoy this one. So here it is, the new update/expansion. We were thinking a lot about the game, and we also wanted to have a serious update but also something fun and enjoyable to enjoy it with. We just changed some things around in the engine and the level editor. And also the way you guys can build stuff with the level editor. So yeah, those who liked it... they love it! It is a rather big update/expansion actually. We have added a new theme, we added the new maps as you guys know from the previous couple of videos. And we've also added some structures to the map. And we added the Vehicle editor. The Vehicle editor is a sub system of the game. If you guys don't want to play online, this is also a thing you can use. We have also added a public chat window that we've made a prototype of. And we added a new log window as you guys already know. We added several new features in the new update/expansion and I think we've done a lot of things and we think we've improved a lot the game, because we think it is really fun to play. We also added a lot of bug fixes as well, so we do hope you like it. We have added two new vehicles. We've also added a new weapon type. So those are new weapons you can use that we don't see in the previous video. We have two new maps. The Vehicle editor is also on the test server now so you guys can play around with it, and you can build what you want in the game and you can also try out the new features as well. The public chat window, the log window, and the in game log window I added some new features in there as well but you know how I'm with my logic, so it is quite easy to log things out. I changed the game a little bit so I think it is not that hard to understand. And we have some new stuff in the game as well. The first one was the new theme we've added. And the second one is the we've added

Fishing vs Zombies is a sidescrolling game that combines the genres of fishing and zombie survival. You play as Tuna, a professional fisherman who has gone on an expedition to the remote paradise island. In the paradise you have to survive hundreds of zombies and hordes of furious fish, while searching for the remnants of the human civilization. And there is a way to do that – to catch a fish with the bait, to lure it to your hook, to leave it hooked, and then to reel it in. Fortunately, you are armed with the world's greatest fishing rod – a huge, long, powerful fishing rod. All you have to do is click on a fish and try to click on the right place, while not forgetting about zombies, traps, bullet raining from trees, and other dangers. The game takes place on the beautiful island, which has been completely destroyed by a natural disaster in the past. Abandoned vehicles, scattered buildings, and some mysterious objects tell of an ancient catastrophe that happened there in the past. When something is not right with the picture, you are often expected to beat all the zombies – with or without the help of baits or your fishing rod; Key Features: Original action – Can you kill and avoid zombies while avoiding traps and bullets from cars and guns?: Classic underwater fishing – It is very different from the games where you are on the surface – you must catch a fish, luring it to your fishing rod with baits; Good graphics – The game is created with unity and has nice 2D animation; Easy controls – The movement and input to the game are very easy; Original game – Fishing vs Zombies is a brand new idea that combines two genres together; Most interesting game modes – You are able to catch the fish (and avoid zombies) in four different game modes – Training, Inline, Survival, Arcade; HD support – The game is delivered in high quality to make the feeling of gameplay even better; Original soundtrack – There is an original soundtrack by NickP. It is available in the game's page or you can purchase it through the bandcamp. FISHING VS ZOMBIES Version 2.1.12 Modified Registry.txt Added czech subtitles. What's new:

Shieldwall Chronicles: Realm of Madness is a fantasy comedy role-playing video game developed by Blue Isle Studios and published by Ubisoft. It was first released for Microsoft Windows in July 2010. A second episode, **Shieldwall Chronicles: Forsaken Sanctuary**, was released in February 2012. **Gameplay** The game is a 2D single-player or multiplayer (through controller) dungeon crawl. **Gameplay** consists of the player taking the role of a 2-8 player party of characters fighting monster groups through a dungeon and completing quests along the way. Each level takes place in a randomly generated 3D environment which features many different types of rooms, monsters, and items, requiring the players to think quickly to solve problems. **Players also have a "Staff Control" feature which allows players to give orders to groups of monsters. Unlike other dungeon crawlers, Shieldwall Chronicles features a so-called "Quicksave", allowing the player to quickly save their current game and return to an earlier location with no loss of progress. Shieldwall Chronicles features two types of in-game currency: Silvers and Gems. Silvers can be acquired through in-game money purchases and can be used to purchase equipment and items. Gems can be earned in-game and can be used to purchase certain bonuses including additional character classes and special skills. Character creation consists of the player choosing five attributes and specific skills. The player must also choose a type of class, and one of three genders, before starting the game. A character can then randomly generate five face traits, background history, personality and/or emotions. Shieldwall Chronicles features the Shieldwall PvP online/multiplayer system which allows players to play against each other online with dedicated servers or PVP in a "personal arena". As in many other role-playing video games, the game provides the player with some sort of social media type-instrument, which allows the player to "boost" their community status. This instrument is called "Shieldwell Chronicle", which the player can "earn" by posting helpful, supportive and entertaining messages in the "Shieldwell Chronicle" panel. Story Setting and elements of the Shieldwall Shieldwall is a realm made up of two islands: the northern island of Clan Moor, which is the upper half of a three-part island, and the southern island of Slee, which is the bottom of the same three-part island. Roughly sixteen years prior to its setting, a civil war had broken out between Clan Moor**
